

The Leaf Jimbaran Sustainability Commitment

We, at The Leaf Jimbaran believe that the well-being of our society and culture are inextricably tied to the health of our environment. Accordingly, we embrace our Tri Hita Karana, which embodies living in harmony with God, other people and nature, by integrating leading environmental principles and sustainability practices into our core business strategy. We actively work to reduce the environmental impact of our business activities and to continually improve and innovate on practices aimed at:

- Conserving natural resources
- Minimizing waste and pollution
- Enhancing indoor environmental quality
- Establishing and reporting on key environmental performance indicators
- Raising environmental awareness among our associates, guests, business partners and communities

The Leaf Jimbaran has achieved Green Concierge Certification, Tier One-Bronze!

In January 2016, The Leaf Jimbaran Bali, a luxurious villa and spa retreat, became certified through the HospitalityGreen (HG) LLC Green Concierge Eco-Business Certification™ program. We acknowledge that, in many ways, we, like the global community we serve, are only in the early stages of developing and implementing the many changes that will be necessary to achieve global sustainability. Nonetheless, we ask for your help, as we strongly believe that our efforts to support a healthy environment serve the interests of both current and future generations and constitute the foundation for enduring success.

We have demonstrated our dedication to the Green Concierge (GC) program through staff trainings, the implementation of recommendations and adherence to the Tier One Bronze set of GC standards.

Throughout the year our property will continue to improve and track our environmentally sustainable practices with the assistance of HG. It is our intention to qualify as a Tier Two – Silver facility under the GC Eco-Business Certification program by the close of 2016.

Our Sustainable Practices

We are implementing the following practices to comply with the **Bronze Tier** standards of the GC certification:

- We conserve energy and water by giving guests the option to reduce daily housekeeping services by offering choice of linen changing, whether daily or every 2 days
- We have adopted a high efficiency lighting conversion program that helps to reduce electricity consumption and carbon dioxide emissions by utilizing low watt Compact Fluorescent Lamps (CFLs) in guest villas and public areas
- Our air-conditioners are Energy Star rated and windows open to encourage our guests to enjoy the fresh air.
- Waste Minimization, Recycling Program and Organic Waste Management currently enables the resort to divert minimum 20% of its trash from the landfill with assorted recycling bins throughout the resort, landscape green waste composting, and unused furniture/appliance/electronics donations to charity and non-profit organizations.
- Sustainable Food & Beverage Menus and Products ensure the conservation and sustainable use of biodiversity and healthy eating habits by sourcing local nutrients and supporting local organic farmers and businesses, fair trade items and eliminating threatened seafood varieties.
- Styrofoam Elimination and use of reusable and /or biodegradable products throughout the property protects human health and mitigates degradation associated with polystyrene manufacturing.
- Sustainable Herb Garden, where the resort's Executive Chef and his culinary team make use of the freshest herbs grown on-site.
- Irrigation Standard Operating Procedures reflect the minimization of water consumption through efficient design, and maintenance of its system utilizing native drought resistant landscape, predawn watering, and leak detection measures.
- We utilize our home made compost for fertilizer reducing chemical dumping into the soil.
- A cultivated roof garden in each villa reflects our reforestation efforts.
- Amenity Donation Program, where gently used shampoos, conditioners and lotions left behind by guests are donated, also contributes to the diversion of waste.

Developed by HospitalityGreen LLC specifically for The Green Concierge Certification™ - 2012. Any use of this material, including reproduction, modification, distribution or republication, without prior written consent of HospitalityGreen is strictly prohibited.

- Community Project lead by the Housekeeping team includes the collection of redeemable recyclables throughout the resort with the proceeds being donated to local schools and children's athletic organizations.
- Earth Hour Participation. Where resort guests and associates joined thousands of people representing various nations around the world to take a stand against climate change through initiatives such as switching off lighting in rooms and selected resort areas for one hour.
- Plastic Bag Ban. The resort has eliminated the use of single-use disposable plastic bags and encourages guests to use reusable shopping bags by providing each family with a complimentary reusable bag during their stay at the villa.
- Recycling of all office equipment white/colored paper, magazines, newspaper, cardboard, and Ink & Toner Cartridge
- Reusable Dry Cleaning & Laundry Bags
- High Efficiency WaterSense Plumbing Fixtures in all toilets, taps and faucets, and shower heads

We want our guests to know about our energy, water and waste saving efforts, and encourage feedback about our sustainable practices. Please ask us if you have questions.

What is HospitalityGreen's Green Concierge Eco-Business Certification™?

Some call it a bird, others a flower or a leaf, either way this is the symbol proudly carried by HospitalityGreen's Green Concierge® (GC) Certified businesses, an internationally recognized third-party certification. The eco-business certification initially developed in 2009 for New York Catskill lodging properties currently has 86 lodging properties throughout the United States. The Leaf Jimbaran, the 87th property, is the first international resort to be participating in the GC Certification. In 2016 24 more properties in the city of Santa Fe will be participating in the certification program.

HospitalityGreen LLC is a New York based consulting firm specializing in environmental and operations consulting services. We partner with service based and product-based clients throughout the hospitality, manufacturing and institutional healthcare industries to implement sustainable business practices, and identify and transform their most critical operational challenges.

The Green Concierge (GC) Certification™, conceived by HospitalityGreen in 2009, works internationally with tourism and lodging facilities to help improve their economic vitality and their sustainable business practices without compromising service delivery or customer satisfaction. The GC Eco-Business Certification provides a third-party audit for improvements in resource conservation and a company culture of environmentally conscious business practices. The GC Certification process is structured

Developed by HospitalityGreen LLC specifically for The Green Concierge Certification™ - 2012. Any use of this material, including reproduction, modification, distribution or republication, without prior written consent of HospitalityGreen is strictly prohibited.

in three tiers (Bronze, Silver and Gold) – with each tier representing a realistic benchmark and advancement to subsequent tiers dependent upon a business' commitment, their verifiable resource tracking, their dedication to developing a company culture grounded in resource conservation and their pursuit of increasingly rigorous sustainable practices.
